

Managing Caches and Cookies

Emptying caches and removing cookies is an important step when using a public browser. Stored cookies and your web history can be used to compromise your security and privacy. If you cannot use [Private Browsing](#) functionality, the following should be done after you finish browsing.

Chrome

Press "Ctrl-Shift-Del" (Windows) or "Cmd-Shift-Del" (Mac).

Make sure "Clear browsing history, Clear download history, Empty cache, Delete Cookies, Clear saved form data, and Clear saved Passwords" are checked.

Choose to obliterate information from the beginning of time.

Click "Clear Browsing Data."

Close the browser.

IE

Tools -> Delete Browsing History -> Delete All.

Close the browser.

Firefox

History -> Clear Recent History -> Time Range: Everything -> check everything under Details -> Clear Now.

Close the browser.

Safari

Safari -> Reset Safari -> check everything -> Reset.

Close the browser.
