

Time-Series Pipeline

The Time-Series Observations (TSO) data processing is performed by the **JWST Calibration Pipeline** which is currently being developed by the Data Management System (DMS) team:

- **JWST Calibration Pipeline repository:** <https://github.com/spacetelescope/jwst>
- **JWST Calibration Pipeline documentation:** <https://jwst-pipeline.readthedocs.io/en/latest/>

The pages here will contain all the information to the different TSO-related steps of the pipeline, how they work & what we think needs improvement.
