Component Overview

The '**Core Search Parameters**' section contains the most common search parameters for the selected data collection, which can vary between the different collections. This page overviews the types of search components and how to specify parameter constraints for components that can be found on multiple data collections.

Parameter Constraint Syntax

There are three categories of search parameters: string (i.e. text), numeric, and datetime. There are thus three slightly different syntaxes when adding additional conditions to a parameter. The specifications outlined below apply equally to [core parameters](#), [additional search parameters](#), and any mission-specific fields.

Hovering over a filter box in the search form will show "tooltips" on using search conditions.

Parameter Constraints: String Fields

How to specify constraints for search components that accept strings: search conditions, valid formats, and some examples.

Search Operation	Format	Example
Exact match	abc	
		
		

Wildcard

*ab*c

Dataset ID, e.g. ICDM79040

Dataset Name=

X*E*0T

Names of Filters/Gratings, e.g. G130M or POL60UV;PR200L

Filters / Gratings=

F1*W

Multiple	abc, def <hr/> ab*, def <hr/> abc, de*, fg*
----------	---

Dataset ID, e.g. ICDM79040

Dataset Name= Z06A0101R,I9ZF01010 ▲

Exclude	!abc <hr/> !ab*c <hr/> !abc,!def <hr/> !ab*,!cd*
---------	---

Names of Filters/Gratings, e.g. G130M or POL60UV;PR200L

Filters / Gratings= !G130M ▼

Type ahead	character or character string	

--	--	--

Parameter Constraints: Numeric Fields

How to specify constraints for search components that accept numeric data types (integer, float): search conditions, valid formats, and some examples.

Search Operation	Format	Example
------------------	--------	---------

Exact Number	any number	<p>Exposure duration in seconds, e.g. 1200</p> <p>Exposure Time= _____</p> <p>1000</p>
	= any number	<p>Exposure duration in seconds, e.g. 1200</p> <p>Exposure Time= _____</p> <p>= 14660</p>

Comparison

> number

>=
number

< number

<=
number

Add or remove additional columns to filter results

Column Name= Spectral Res	Condition= >= 20000
------------------------------	------------------------

Range

num1 ..
num2

Add or remove additional columns to filter results

Column Name= RA (J2000) ▼	Condition= 15.0567 ..17.6709	✕
Column Name= Dec (J2000) ▼	Condition= -10.00 .. 5.56	✕

Calculated Range	num1 +- num2 <hr/> num1 +- num2%	<div style="background-color: #333; color: white; padding: 5px;"> <p>Add or remove additional columns to filter results</p> <table border="0" style="width: 100%; border-collapse: collapse;"> <tr> <td style="border: 1px solid #ccc; padding: 2px;"> Column Name= Exp Time </td> <td style="border: 1px solid #ccc; padding: 2px;"> Condition= 400 +- 300 </td> <td style="border: 1px solid #ccc; padding: 2px; text-align: right;">✕</td> </tr> <tr> <td style="border: 1px solid #ccc; padding: 2px;"> Column Name= Central Wavelength </td> <td style="border: 1px solid #ccc; padding: 2px;"> Condition= 3000 +- 15% </td> <td style="border: 1px solid #ccc; padding: 2px; text-align: right;">✕</td> </tr> </table> </div>	Column Name= Exp Time	Condition= 400 +- 300	✕	Column Name= Central Wavelength	Condition= 3000 +- 15%	✕
Column Name= Exp Time	Condition= 400 +- 300	✕						
Column Name= Central Wavelength	Condition= 3000 +- 15%	✕						

Parameter Constraints: DateTime Fields

How to specify constraints for search components that accept dates or times: search conditions, valid formats, and some examples.

Search Operation	Format	Example
------------------	--------	---------

<p>Exact date /time</p>	<p>yyyy-mm-dd</p> <hr/> <p>yyyy-mm-dd hh:mm:ss</p>	<div data-bbox="537 136 1494 268" style="background-color: #333; color: white; padding: 5px;"> <p>Find data observed on or between these dates</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="border: 1px solid white; padding: 2px;">Obs Start Date=</td> <td style="border: 1px solid white; padding: 2px;">Time=</td> <td></td> <td style="border: 1px solid white; padding: 2px;">Obs Start Date=</td> <td style="border: 1px solid white; padding: 2px;">Time=</td> </tr> <tr> <td style="border: 1px solid white; padding: 2px;">2010-06-09</td> <td style="border: 1px solid white; padding: 2px;">00:00:00</td> <td style="text-align: center;">to</td> <td style="border: 1px solid white; padding: 2px;">2010-06-13</td> <td style="border: 1px solid white; padding: 2px;">03:15:00</td> </tr> </table> </div>	Obs Start Date=	Time=		Obs Start Date=	Time=	2010-06-09	00:00:00	to	2010-06-13	03:15:00
Obs Start Date=	Time=		Obs Start Date=	Time=								
2010-06-09	00:00:00	to	2010-06-13	03:15:00								
<p>Comparison</p>	<p>> yyyy-mm-dd</p> <hr/> <p>>= yyyy-mm-dd</p> <hr/> <p>< yyyy-mm-dd</p> <hr/> <p><= yyyy-mm-dd</p>	<div data-bbox="391 1171 1343 1266" style="background-color: #333; color: white; padding: 5px;"> <p>Add or remove additional columns to filter results</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="border: 1px solid white; padding: 2px;">Column Name=</td> <td style="border: 1px solid white; padding: 2px;">Condition=</td> </tr> <tr> <td style="border: 1px solid white; padding: 2px;">Release Date</td> <td style="border: 1px solid white; padding: 2px;"><= 1999-10-21</td> </tr> </table> </div>	Column Name=	Condition=	Release Date	<= 1999-10-21						
Column Name=	Condition=											
Release Date	<= 1999-10-21											

Range	yyyy-mm-dd .. yyyy-mm-dd	<div style="background-color: #333; color: white; padding: 5px;"> <p>Add or remove additional columns to filter results</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 50%; padding: 2px;"> Column Name= Archive Date </td> <td style="width: 50%; padding: 2px;"> Condition= 2010-05-10 .. 2010-06-30 </td> </tr> </table> </div>	Column Name= Archive Date	Condition= 2010-05-10 .. 2010-06-30
	Column Name= Archive Date		Condition= 2010-05-10 .. 2010-06-30	
yyyy-mm-dd hh:mm:ss .. yyyy-mm-dd hh:mm:ss				

Examples of Spectral Element Searches

Operation	Examples	Note
Exact match	G130M	<p>Type an exact name of the filter, grating, or the combination filter set to retrieve only observations associated with the input string.</p> <div style="border: 1px solid green; padding: 5px; margin-top: 10px;"> Combination filter sets are delimited by a semicolon (;). Remember that combination sets are single strings. </div>
	MIRRORA	
	POL120UV; F330W	
	F2ND; CLEAR2; F1ND;F372M	
Wildcard	G*M	This example retrieves observations that used grating names starting with 'G' and ending with 'M' such as 'G150M' or 'G220M'.
	F81*	Since a combination filter set is considered as a single string, the input wildcard characters 'F81*' retrieve all observations associated with the filter 'F814W' and the other ones such as 'F814W;POLQN18' and 'F814W;F791W'.
Multiple	G130M, F550W	The 'Multiple' operator (',') acts as the logical operator 'OR'. Thus this example retrieves observations used the grating 'G130M' or the filter 'F550W'.
	F550W, POL60UV; PR200L	<p>This example retrieves observations used the filter 'F550W' or the combination filter set 'POL60UV;PR200L'.</p> <div style="border: 1px solid red; padding: 5px; margin-top: 10px;"> Be sure to use the 'Multiple' operator, comma (,) not a semicolon (;) used for appending filters for combination filter set names. </div>
Exclude	!F550W	This operation excludes any observations using the filter 'F550W'.
	G*;!G140L	This search retrieves observations using all grating options ('G*') except the grating 'G140L'.
Type ahead		<div style="border: 1px solid yellow; padding: 5px;"> Type ahead limitation Note that this only shows a list of single spectral elements and not combination filter sets. </div>
