

# STScI Town Hall - June 2022, AAS 240

The Space Telescope Science Institute (STScI) serves the astronomical community through the operation of multiple NASA flagship missions including Hubble, JWST, and WFIRST, the development of advanced data and science archives, including Kepler and TESS, and the dissemination of astronomical information to the broadest public audiences. The STScI Town Hall serves as the center piece for our AAS 240 presence. We will report on the status of our existing and upcoming missions, describe new tools available through the MAST database system, and outline mission-related community opportunities in the coming year.

June 14, 12:45 pm, Ballroom D

## Speaker schedule

Nancy Levenson	<a href="#">Introduction and STScI Update</a>
Joshua Peek	<a href="#">Enabling Data Science at MAST</a>
Neill Reid	<a href="#">STScI Missions and Community Opportunities</a>
