Context: Portal Search Results

One-click download is the simplest and fastest way to retrieve **a single result** from the results table. The result is usually an Observation, which can contain multiple files.

The screenshot displays the Portal Search Results interface. On the left, there is a 'Filters' panel with a 'Keyword/Text Filter' and a 'Mission' section listing various missions like SPITZER_SHA, HLA, HST, IUE, SWIFT, PS1, TESS, and FUSE. The main area shows a table of search results for 'MESSIER 057, radius: 0.01667°'. The table has columns for 'Actions', 'Preview', 'Mission', 'Instrument', 'Filters', 'Target Name', 'Calib...', and 'Exposure...'. Three rows of results are visible, each with a preview image of the target. On the right, the 'AstroView' tool shows a detailed view of the target, including its coordinates (18:53:49.179 +32:58:51.48) and a 'RAD' label.

Instant observation download is available after a successful Portal search, where the results are presented in a table format flanked by applicable [filters](#) (left) and the [AstroView](#) tool (right). It is also possible to export the search results table to a local file.

Observation Instant Download

Click the **File** icon  to initiate a download of a single observation. If *Exclusive Access* data are selected without logging in, the Portal will warn that you are not logged in. Proceeding without logging in will allow the download of only data products that are not protected by *Exclusive Access*.

Successful download will result in a zip file containing the [Minimum Recommended Products](#) contained within that observation. A pop-up like the one on the left may appear, depending upon your browser settings.

Export Search Results

Export Table As...

File

File Name: MAST_m57_r_1m.csv

Format: Comma Separated (.csv)

Which Columns? Displayed ☒ All (incl. footprints) ☐

Which Rows? Selected ☐ Displayed ☒

Export Cancel

Click the **Download** icon  to save the results table to a local file. The table can contain:

- All columns, or only those displayed
- All displayed rows, or only those selected with a checked box
