

WebServices for Catalog Access

This webservice allows either forms access or programmatic access to the Guide Star Catalog(s) as well as a number of other catalogs available from MAST.

Required Parameter List

1 of the following 4 queries - VO ConeSearch, BoxSearch, StcsSearch, IDsearch

1. RA=ra(deg) &DEC=dec(deg) &SR=search radius(deg)
2. BBOX=raMin(deg),decMin(deg),raMax(deg),decMax(deg)
3. STCS=Space Time Coordinate System shape (eg, CIRCLE ICRS 254.58755449 34.21313021 0.1 or POLYGON 180.428742 -18.893042 180.455582 -18.906816 180.488081 -18.858382 180.461245 -18.84461 180.428742 -18.893042)
4. ID=catID (NOTE: do NOT place quotes around the IDs)

Optional Parameters

- FORMAT= VOTABLE(default) | HTML | KML | CSV | TSV | JSON | TEXT(limited set of catalogs)
- FILENAME=outputname (directs output to file)
- MAXOBJ=n (limits number of entries returned by brightest magnitude)
- MAGRANGE=bright,faint (limits number of entries returned by limits)
- MINDET=n (minimum numbr of detections PanSTARRS only)
- EPOCH=yyyy.y (Updates ra/dec using proper motion IF AVAILABLE)
